

- Dockerhub:

The screenshot shows the Docker Hub interface for the user 'myluc'. The page displays a list of repositories under the namespace 'myluc'. The repositories are:

- myluc / udacity-restapi-user**: Updated 4 minutes ago, 0 stars, 6 downloads, PUBLIC.
- myluc / udacity-restapi-feed**: Updated 4 minutes ago, 0 stars, 4 downloads, PUBLIC.
- myluc / udacity-frontend**: Updated 18 minutes ago, 0 stars, 2 downloads, PUBLIC.
- myluc / reverseproxy**: Updated 19 minutes ago, 0 stars, 3 downloads, PUBLIC.

A tip at the bottom suggests: "Tip: Not finding your repository? Try switching namespace via the top left dropdown."

- Travis-ci (see <https://api.travis-ci.com/v3/job/335693921/log.txt> for more detail)

The screenshot shows the Travis CI build page for the repository 'mluc / udacity-cloud-developer'. The build status is 'build: unknown'. The left sidebar shows a list of repositories and their build status:

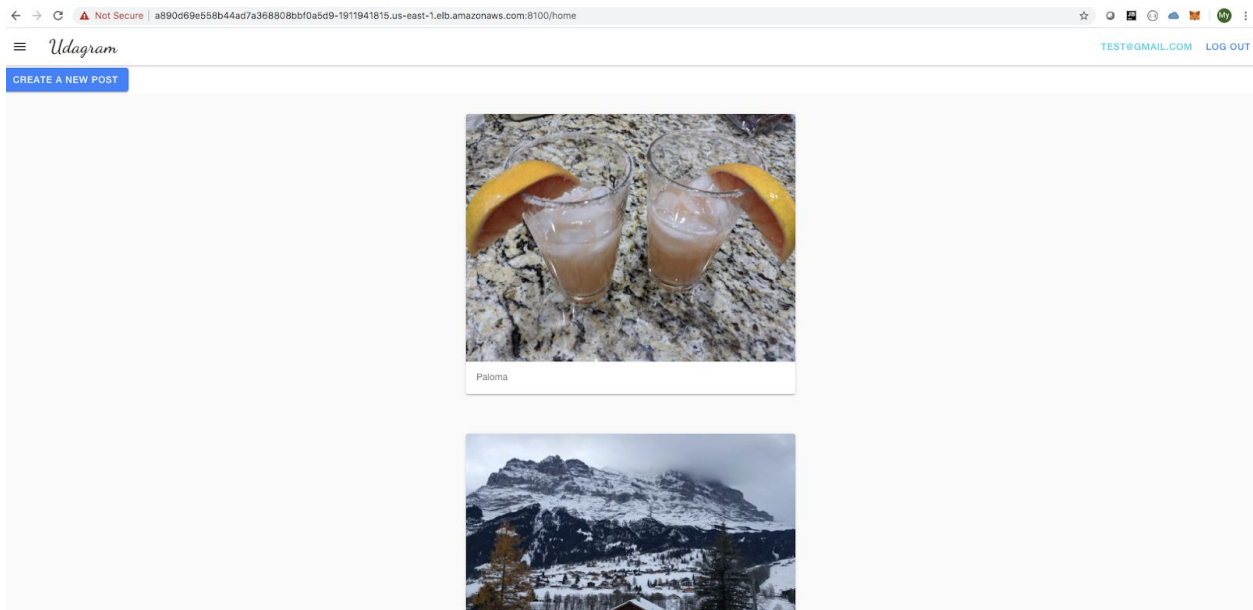

- mluc/udacity-cloud-developer**: #9, Duration: 11 min 8 sec, Finished: 4 minutes ago.
- mluc/udacity-testing**: #43, Duration: 1 min 50 sec, Finished: 10 days ago.

The main content area shows the build details for 'project3-microservices V1'. The build log is visible, showing the following steps:

1. Build system information
2. \$ git clone --depth=50 --branch=project3-microservices https://github.com/mluc/udacity-cloud-developer.git mluc/udacity-cloud-developer
3. Setting environment variables from repository settings
4. \$ export dockerhub=[secure]
5. \$ export aws_access_key_id=[secure]
6. \$ export aws_secret_access_key=[secure]

The build log also shows the output of the 'systemd' command, indicating that the system is running.

- Application:

- kubectl get all

```
Roberts-MBP:k8s myluc$ kubectl get all

Try the new design for Amazon CloudWatch Logs
We will soon launch a new design for the CloudWatch Logs console and would appreciate your feedback. To participate, choose the following link.
[Try the new design](#)

CloudWatch > Log Groups

Create Metric Filter Actions

Filter: Log Group Name Prefix

Log Groups	Insights	Expire Events After	Metric Filters	Subscriptions
/aws/eks/prod2/cluster	Explore	Never Expire	0 filters	None
/aws/rds/instance/udagrammlucdev/postgresql	Explore	Never Expire	0 filters	None
/aws/rds/instance/udagrammlucprod/postgresql	Explore	Never Expire	0 filters	None
RDSOSMetrics	Explore	1 month (30 days)	0 filters	None

← → ↻ console.aws.amazon.com/cloudwatch/home?region=us-east-1#logStream:group=/aws/eks/prod2/cluster

aws Services Resource Groups

CloudWatch > Log Groups > Streams for /aws/eks/prod2/cluster

Search Log Group Create Log Stream Delete Log Stream

Filter: Log Stream Name Prefix
